# Md Sakib Sadman Badhon

Mohammadpur, Dhaka | +8801838214970 | badhon495@gmail.com | linkedin.com/in/badhon495
badhon495.github.io | github.com/badhon495

## Experience

**Trainee Software Engineer** Apr. 2026 – Nov. 2026
*National Polymer Group* *Dhaka, Bangladesh*

- Administered the company website's production server (Oracle Linux, cPanel/Plesk), handling domain connection, SSL certificate issuance/renewal, and DNS configuration.
- Provisioned and configured a **staging clone** of the backend server on separate infrastructure, replicating services, packages, and cron jobs to test changes before production deployment.
- Performed ongoing server maintenance: log monitoring and rotation, troubleshooting outages, and applying fixes to maintain uptime for **1,200+ users** across in-house Sales, Dealer, and Office applications.
- Modernized the company website's legacy codebase and hardened server configuration, improving SEO performance and mitigating common attack vectors.

## Education

**Bachelor of Science in Computer Science** Jan. 2022 – Jan. 2026
*BRAC University* *Dhaka, Bangladesh*

- CGPA: **3.74**/4.00 (High Distinction)
- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across **6 of 12 semesters**.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

## Projects

**Easy Docker Installation (Cross-Distro Automation)** 2024
*Bash, Linux, Systemd, Package Managers (apt/yum/dnf/zypper)* Code

- Built a one-command Bash installer that detects the Linux distribution via `/etc/os-release` and dispatches the correct setup routine, supporting **8 distros** (Ubuntu, Debian, CentOS, Fedora, Kali, Mint, LMDE, OpenSUSE).
- Automated the full provisioning workflow – old-package cleanup, repo/key setup, installation, and `hello-world` verification – **replacing 20+ manual commands**; published as a `curl | bash` one-liner.

**Should I Retake (Academic Analytics Platform)** 2025
*JavaScript (ES6+), PDF.js, SheetJS, jsPDF, HTML5, CSS3* Live | Code

- Built a zero-backend, privacy-first CGPA planner that parses official grade sheets in-browser, so **no student data leaves the device**; deployed on GitHub Pages, serving **10,000+ monthly users** at zero infrastructure cost.
- Engineered a fault-tolerant parser (parallel page extraction, coordinate-based line reconstruction, regex and word-level fallback) with domain rules for Repeat and Retake detection, best-grade duplicate resolution, and prep-course exclusion.

**ShikkhaDwar (Learning Management System)** *(Team of 3)* 2025
*Flask, SQLAlchemy, PostgreSQL, Gunicorn, Render* Live | Code

- Architected a role-based LMS (student, instructor, admin) with **11 relational models** and **40+ endpoints** in modular Flask blueprints, using hashed credentials and ownership checks.
- Deployed and configured the Gunicorn/PostgreSQL stack on Render, managing environment config, database provisioning, and release process for the live service.

## Open Source and Problem Solving

**Open Source**
tldr-pages, OpenTelemetry – Maintainer

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars**.
- Improved accessibility of developer documentation for Bangla-speaking users.
- Collaborated with global maintainers via code reviews, issue tracking, and GitHub Actions CI/CD.

**Problem Solving**

- Solved **150+** problems on LeetCode & HackerRank, covering SQL, DSA, DP, and graph algorithms.

## Technical Skills

**Systems & OS:** Linux (Ubuntu, Debian, CentOS, Fedora, Oracle Linux), Windows, Bash scripting | **Server/Web Admin:** cPanel/Plesk, domain & DNS, SSL/TLS issuance and renewal, Nginx/Apache
**Networking & Security:** Firewall/SELinux, troubleshooting, log monitoring and rotation, incident response | **Automation & CI/CD:** Git, GitHub Actions, Docker, cron
**Databases:** Oracle, PostgreSQL, MySQL | **Languages/Frameworks:** Python, Java, Kotlin, JavaScript, SQL, React, Laravel, Flask | **Tools:** Postman, Jira, Swagger, Selenium, k6

## Certifications

**Google Cybersecurity Professional Certificate** (2023) — Covers threat detection, Linux security, SQL, and incident response.
**GitHub Foundations Certification** (2024) — Validates Git workflows, collaboration, and repository management.
**Postman API Fundamentals Student Expert** (2025) — Demonstrates API design, testing, and automation skills.
