Experience

Trainee Software Engineer — Apr. 2026 – Present
National Polymer Group — *Dhaka, Bangladesh*

- Maintained in-house Sales, Dealer, and Office applications used by **1,200+ users** across the organization.
- Redesigned the Sales app using newer, efficient packages, cutting size from **35 MB to 17 MB** and boosting speed up to **50%**.
- Shipped **6+ new Sales app features**, including conveyance bill submission, an analytics dashboard, and pause-order delivery.
- Migrated the Office app from React Native to Kotlin, improving performance and reducing app size from **19 MB to 5 MB**.

Education

Bachelor of Science in Computer Science — Jan. 2022 – Jan. 2026
BRAC University — *Dhaka, Bangladesh*

- CGPA: **3.74**/4.00 (High Distinction)
- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across **6 of 12 semesters**.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

Projects

Should I Retake (Academic Analytics Platform) — 2025
JavaScript (ES6+), PDF.js, SheetJS, jsPDF, HTML5, CSS3 — Live | Code

- Built a zero-backend, privacy-first CGPA planner that parses official grade sheets in-browser, so **no student data leaves the device**; deployed on GitHub Pages, serving **10,000+ monthly users** at zero infrastructure cost.
- Engineered a fault-tolerant parser (parallel page extraction, coordinate-based line reconstruction, regex and word-level fallback) with domain rules for Repeat and Retake detection, best-grade duplicate resolution, and prep-course exclusion.
- Added a real-time "what-if" grade editor with debounced updates and DOM caching for low-end devices, along with one-click client-side Excel export and generation of multi-page, watermarked PDF grade sheets.

ShikkhaDwar (Learning Management System) *(Team of 3)* — 2025
Flask, SQLAlchemy, PostgreSQL, ReportLab, Gunicorn, Render — Live | Code

- Architected a role-based LMS (student, instructor, admin) with **11 relational models** and **40+ endpoints** in modular Flask blueprints, using hashed credentials and ownership checks.
- Built an assessment engine with MCQ, true/false, short-answer, and essay questions, featuring auto-grading, attempt limits, passing scores, and an instructor manual-grading gradebook.
- Automated certification by gating a server-generated PDF certificate (ReportLab) on lesson progress and quiz scores; added transactional one-click course cloning and instructor analytics.

Dhikr (Tasbih Counter App) — 2026
Kotlin, Jetpack Compose, Material 3, Room, DataStore, Coroutines/Flow, R8 — Download | Code

- Built and shipped an offline-first Android app (MVVM, Room, DataStore) with routines, analytics, widgets, and reminders, using **AI-assisted workflows (Claude Code)** while owning architecture and review.
- Integrated optional Gemini dhikr benefits and Google Drive sync, storing keys/tokens in **encrypted on-device storage**.
- Improved release performance with **Baseline Profiles**, Macrobenchmarks, and R8 shrinking.

Easy Docker Installation (Automated Script) — 2024
Bash, Linux — Code

- Built a one-command installer that detects the Linux distribution and runs the setup script, supporting **8 Linux distros**.
- Automated the full workflow from old-package cleanup to `hello-world` verification, **replacing 20+ manual commands**.

Open Source and Problem Solving

Open Source
tldr-pages, OpenTelemetry – Maintainer

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars**.
- Improved accessibility of developer documentation for Bangla-speaking users.
- Collaborated with global maintainers via code reviews, issue tracking, and GitHub Actions CI/CD.

Problem Solving

- Solved **150+** problems on LeetCode & HackerRank, covering SQL, DSA, DP, and graph algorithms.

Technical Skills

Languages: Python, Java, Kotlin, JavaScript, SQL, Bash | **Databases:** Oracle, PostgreSQL, MySQL
Frameworks: React, Laravel, Flask | **Systems:** Linux (CLI, Bash scripting)
Tools: Git, GitHub Actions, Docker, Postman, Jira, Swagger | **Testing:** Selenium, k6, Unit Testing

Certifications

Google Cybersecurity Professional Certificate (2023) — Covers threat detection, Linux security, SQL, and incident response.
GitHub Foundations Certification (2024) — Validates Git workflows, collaboration, and repository management.
Postman API Fundamentals Student Expert (2025) — Demonstrates API design, testing, and automation skills.
