EXPERIENCE

Trainee Software Engineer

Apr. 2026 – Present

National Polymer Group

Dhaka, Bangladesh

- Maintained in-house Sales, Dealer, and Office applications used by **1,200+ users** across the organization.
- Redesigned the Sales app using newer, efficient packages, cutting size from **35 MB to 17 MB** and boosting speed up to **50%**.
- Shipped **6+ new Sales app features**, including conveyance bill submission, an analytics dashboard, and pause-order delivery.
- Migrated the Office app from React Native to Kotlin, improving performance and reducing app size from **19 MB to 5 MB**.

EDUCATION

BRAC University

Jan. 2022 – Jan. 2026

Bachelor of Science in Computer Science — CGPA: **3.74/4.00** (High Distinction)

Dhaka, Bangladesh

- Awarded Vice Chancellor's List, Dean's List, and Merit Scholarship across **6 of 12 semesters**.
- Relevant Coursework: DBMS, System Design, Machine Learning, Cloud Computing, Networking, Web Development

PROJECTS

Should I Retake (Academic Analytics Platform)

2025

JavaScript (ES6+), PDF.js, SheetJS, jsPDF, HTML5, CSS3

[Live](#) | [Code](#)

- Built a zero-backend, privacy-first CGPA planner that parses official grade sheets in-browser, so **no student data leaves the device**; deployed on GitHub Pages, serving **10,000+ monthly users** at zero infrastructure cost.
- Engineered a fault-tolerant parser (parallel page extraction, coordinate-based line reconstruction, regex and word-level fallback) with domain rules for Repeat and Retake detection, best-grade duplicate resolution, and prep-course exclusion.
- Added a real-time “what-if” grade editor with debounced updates and DOM caching for low-end devices, along with one-click client-side Excel export and generation of multi-page, watermarked PDF grade sheets.

ShikhaDwar (Learning Management System) (Team of 3)

2025

Flask, SQLAlchemy, PostgreSQL, ReportLab, Unicorn, Render

[Live](#) | [Code](#)

- Architected a role-based LMS (student, instructor, admin) with **11 relational models** and **40+ endpoints** in modular Flask blueprints, using hashed credentials and ownership checks.
- Built an assessment engine with MCQ, true/false, short-answer, and essay questions, featuring auto-grading, attempt limits, passing scores, and an instructor manual-grading gradebook.
- Automated certification by gating a server-generated PDF certificate (ReportLab) on lesson progress and quiz scores; added transactional one-click course cloning and instructor analytics.

Dhikr (Tasbih Counter App)

2026

Kotlin, Jetpack Compose, Material 3, Room, DataStore, Coroutines/Flow, R8

[Download](#) | [Code](#)

- Built an offline-first, ad-free native Android app (MVVM, Room, DataStore) with a tap-to-count engine, multi-step routines, insights charts, bilingual English/Bangla UI, home-screen widgets, JSON backup/restore, and reboot-persistent reminders.
- Integrated optional Gemini-generated dhikr benefits, storing the user's API key in **encrypted on-device storage**.
- Improved startup and release performance with **Baseline Profiles**, Macrobenchmarks, R8 shrinking, and unit tests.

Easy Docker Installation (Automated Script)

2024

Bash, Linux

[Code](#)

- Built a one-command installer that detects the Linux distribution and runs the matching setup script, supporting **8 Linux distros**.
- Automated the full workflow from old-package cleanup to hello-world verification, **replacing 20+ manual commands with 1**.

OPEN SOURCE & PROBLEM SOLVING

Open Source

[tldr-pages](#), [OpenTelemetry](#) – Maintainer

- Contributed **50+ merged pull requests** across repositories with **62,000+ combined GitHub stars**.
- Improved accessibility of developer documentation for Bangla-speaking users.
- Collaborated with global maintainers via code reviews, issue tracking, and GitHub Actions CI/CD.

Problem Solving

- Solved **150+** problems on LeetCode & HackerRank, covering SQL, DSA, DP, and graph algorithms.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript, SQL, Bash | **Databases:** Oracle, PostgreSQL, MySQL

Frameworks: React, Laravel, Flask | **Systems:** Linux (CLI, Bash scripting)

Tools: Git, GitHub Actions, Docker, Postman, Jira, Swagger | **Testing:** Selenium, k6, Unit Testing

CERTIFICATIONS

Google Cybersecurity Professional Certificate (2023) — Covers threat detection, Linux security, SQL, and incident response.

GitHub Foundations Certification (2024) — Validates Git workflows, collaboration, and repository management.

Postman API Fundamentals Student Expert (2025) — Demonstrates API design, testing, and automation skills.
